# MEDENT Mobile
Biometric Login

HOW TO USE TOUCH OR FACE ID TO LOG INTO MEDENT MOBILE

NOTE: The mobile user must already be set up for MEDENT Mobile and previously logged in. The mobile user must register a Biometric Login for each desired browser on each device.

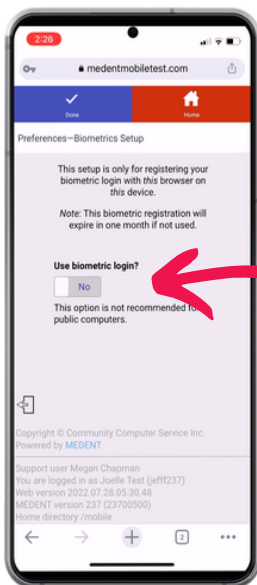

NEW!

Note: This button only appears when a user has an updated webmain and is using a browser and device that supports it.
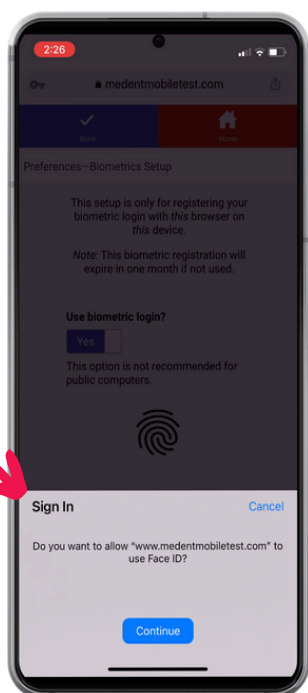

Open **Preferences**

After logging into MEDENT Mobile using the standard user ID and password, press the gear icon ⚙ to open the Preferences page.

Setting this to Yes will initiate the registration process, which will differ for each operating system.

## Open **Biometrics Setup**

Click **Biometrics** to open the setup page. Set **Use biometric login** to **Yes**.

Follow the prompts to allow biometric login.

Complete **Registration Process**

Generally the user will "Verify your identity" with a fingerprint or Face ID. After completing the registration process, the user will automatically be brought back to the main Preferences page.

Click here to sign in with a user ID and password instead.

Use **Touch or Face ID** to log in!

Sign in using biometrics! Once you've previously registered a biometric login, you can always switch to user ID/password instead.
