

HOW TO START REMOTE PATIENT MONITORING

with MEDENT & FocusMD

01 OBTAIN PATIENT CONSENT & MEDICAL DEVICES

MEDENT will export a General Order to HealthxSolutions to establish the patient and home monitoring device(s).

MONITOR DAILY VITALS

02

Daily vitals are sent to the Care Management Dashboard and HealthxSolutions lets users import home monitored results into the Vitals section of the MEDENT patient chart. FocusMD helps monitor the results so there is no extra burden on the practice!

03 TRACK MONTHLY VITALS REPORTS

Monthly vitals reports are returned from HealthxSolutions and routed to the document section of the patient chart in MEDENT.

BILL RELATED CHARGES

04

Charges are returned from HealthxSolutions to be billed in MEDENT.
