HEDIS
Practice Setup

Navigation

Medical Records > Medical Records Setup > DM/Quality > HEDIS > HEDIS Practice Setup

NOTE: You must have security to access this area.

Add Measures

Measures are listed in order by ID.

All measures display in **red** until setup is complete. Each measure needs at least one CPT, Provider and Insurance.

Select Your Codes

Your practice is responsible for setting up and maintaining each measure.

The codes you are billing must match the codes entered here; otherwise, you will not receive a pop-up.

Auto Answer

Additional Filters > Auto Answer Options

Check "Auto Answer Active" and select where you would like the Auto Answer to occur. Choose whether you'd like a pop-up if the results can't be determined and set your filters.

NOTE: This feature cannot be used with all measures (e.g. Falls Risk).

Additional Filters

You must make sure you have the correct labs and CPT codes selected to ensure the pop-up and/or Auto Answer will be triggered.

You must also make sure the status or "Date To Use" matches the lab result (e.g. RcvdCp "Received Complete").

POP-UPS

When set up correctly, medent will prompt you to choose an applicable CPT II or G-code for a qualifying patient in the following areas: **Progress Note, eSuperbill and/or Charge Entry.**
