Security Checklist

Things You Should Have In Place

SECURITY PLAN
A comprehensive security plan for your network and devices, including firewalls, email spam, virus and ransomware protections.

IT COMPANY
Experienced staff outside of medent assigned to the development, execution and monitoring of your Security Plan.
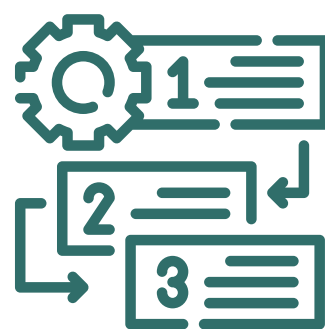

CYBER INSURANCE
A specialty insurance product intended to protect businesses from Internet-based risks.

DISASTER RECOVERY PLAN
A plan to make sure your business can continue operating with minimal losses in the event of a cyber threat or breach.

TRAINING
Review **medent's Video on Ransomware** with employees and learn how you can protect yourself from a security breach.

As a reminder, medent's role in your security includes:
- Secure medent software application design and updating
- HIPAA compliancy with external medent interfaces
- Server operating system patches and some basic firewall and antivirus protections
- Backup monitoring
