

So you need to set up Pharmacies in medent.

What's next?

The e-prescribe pharmacy file is maintained by SureScripts and is updated with medent's backup. The pharmacy list is set up by state and can be pared down to the counties that are applicable to the practice.

Set Up E-Prescribe Pharmacies

Medical Records > Medical Records Setup > Allergy/Drug/Pharmacy/Eye > Pharmacies > Pharmacy Lookup Options > State > Counties

- Select the desired counties. Only those counties will show in the pharmacy lookup.

Selected counties will appear in blue.

medent recommends offices only select the county(ies) they write many scripts in. This will eliminate the pharmacy selection list from getting cluttered and prevents the system from slowing down, which will help the prescriber be more efficient.

All pharmacies for a specified state will still be available for use by clicking **Filter By State** at the bottom of the pharmacy lookup box and selecting a state. The following U.S. territories are also available: Puerto Rico, Guam, U.S. Virgin Islands and Northern Mariana Islands.

Questions? Submit a support request at medent.com.

Pharmacy Lookup

- Mail order pharmacies for all 50 states will appear in the list regardless of which counties you have selected. They will have the letter M to the left of the name of the pharmacy at the patient level.

M Aetna Specialty Pharmacy LLC

- Pharmacies in black are true edi pharmacies and will be sent electronically through the VPN.
- Pharmacies in gray cannot be sent electronically to the pharmacy and cannot send refill requests electronically to the office. Scripts will be faxed to these pharmacies when the user clicks eRx.
