Portal Capabilities

Secure Online Access

Use a computer, smartphone or tablet to view and print portions of your medical records.

Convenient Communication

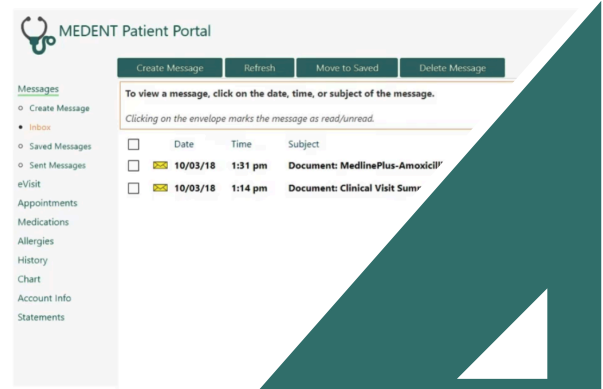

Send and receive non-urgent messages and information, including test results and educational material.

Update Information

Notify the practice of changes to your personal information, including your phone number, address and insurance.

Portal Activation

As a patient at our practice, you're eligible for a free Patient Portal account! You just need to contact our office for your activation code.

Once you have your unique code, you can create a username, password and other login information used to verify your identity.

NOTE: Your activation code is case sensitive. You must also enter your name as it appears in our practice system.

Contact our practice to receive your Patient Portal activation code today!

We also have several video tutorials available to help you activate and access your account.
