

Patient Pre-Check-In

Powered by medent

Use your computer, smartphone or tablet to complete most of the check-in process before your appointment!

When you schedule an appointment, you will receive a unique link via text and/or email. Simply click the link, confirm your identity and review and update your information. It typically takes about 5-10 minutes to complete, depending on the type of appointment; some visits require more documentation than others.

Pre-Check-In Tips

Make sure you have your driver's license or photo ID and your insurance card on hand. You may be asked to add photos of these items.

If using a mobile device, lay your ID or insurance card on a flat, well-lit surface and turn your phone sideways to take a photo.

For patient photos, use a recent headshot or selfie with only your face in it. You may need to let your browser access your camera in your settings.
